

## EXPERIENCE

### Principal Motion Designer

**OIOLLI - Freelance**  
February 2011 - Present

Entering the field as a post production generalist, my interests evolved to procedurally driven CG. Currently working in Houdini, I have over a decade of experience with Cinema 4D, After Effects, and countless other tools.

Responsibilities varied per role, from pitches to client sessions to managing teams to leading the creative. These are my notable partnerships:

### Design Director, Motion

**Landor & Fitch - Staff**  
July 2022 - August 2023

Led motion design efforts for L&F's Chicago studio, working alongside designers across the North American region.

Project scope and scale varied, from product lineups, rapid explorations, to new identities. I was essential in creating the motion identity for Brunswick, produced and led product demos for Tempur-pedic, and pitched high-end brands.

Mentored several designers on the motion team, advised how to punch up work, learn new tricks of the trade, and improve workflow. I trained client in-house teams on custom toolkits.

Researched and developed remote pipeline solutions. Integrated a Houdini workflow with Unreal Engine for interactive clients. Gave simulation support across the region.

### Editor & Animator

**Mic - Staff**  
January 2017 - May 2017

Conceived, designed, and executed internal sizzle reels for the use of B2B pitches for content development.

Supported other teams for motion design elements and assisted junior designers. The B2B team was scaled down shortly after I joined.

### Motion Designer

**Lineage Interactive - Staff**  
July 2015 - January 2016

Primarily worked with 2D animation and took on graphic design tasks as needed.

Political campaigns, pharmaceutical companies, and sports teams were some of the clientele.
